

## **CLAIMS**

Claims 1 – 14. (Canceled)

15. (Currently amended) A product of fibrous material imparting a sense of freshness when said product contacts skin, comprising at least in part on a surface of said product 0.1 g/m<sup>2</sup> to 20 g/m<sup>2</sup> of an agent comprising at least one fatty acid ester, wherein a carbon chain of which the fatty acid ester is of C10-C14; and of an alcohol, wherein a carbon chain of which the alcohol is of C10-C14.

16. (Previously presented) A product of fibrous material according to claim 15, wherein the agent melts at a temperature in a range from 20°C to 37°C.

17. (Previously presented) A product of fibrous material according to claim 15, wherein the agent comprises at least 60% of said at least one ester, with a remainder being selected from solvents, fatty acid esters, fatty alcohols, or mineral oils.

18. (Previously presented) A product of fibrous material according to claim 15, wherein the agent comprises at least dodecylic ester of dodecanoic acid.

19. (Previously presented) A product of fibrous material according to claim 15, wherein the agent comprises between 75% and 40% by weight of dodecylic ester of dodecanoic acid.

20. (Previously presented) A product of fibrous material according to claim 15, wherein the agent is distributed substantially on the surface of the product.

21. (Previously presented) A product of fibrous material according to claim 15, wherein said product comprises at least 2 g/m<sup>2</sup> of said agent.

22. (Previously presented) A product of fibrous material according to claim 21, wherein said agent is less than 6 g/m<sup>2</sup>.

23. (Previously presented) A product of fibrous material according to claim 15, wherein the agent is distributed discontinuously over said product.

24. (Previously presented) A product of fibrous material according to claim 23, wherein the agent is distributed in strips parallel to each other over said product.

25. (Previously presented) A product of fibrous material according to claim 15, wherein the agent is distributed as a continuous film over said product.

26. (Previously presented) A product of fibrous material according to claim 15, wherein the agent is distributed over a top surface and a bottom surface of said product.

27. (Previously presented) A product of fibrous material according to claim 15, wherein the fibrous material comprises an absorbent paper.

28. (Previously presented) A product of fibrous material according to claim 15, wherein the fibrous material comprises absorbent cotton or a bonded web of natural, artificial or synthetic textile fibers.

Application No. 10/595,745

Response dated: October 16, 2009

Reply to Final Office Action of: July 16, 2009

29. (Previously presented) A product of fibrous material according to claim 15, wherein the fibrous material is of cotton or cotton in mixture with artificial or synthetic fibers.
